Comments

Equipment build: 7mm suit + vest w/hood; one light; 131lbs weight; camera with strobe,

Met up with the Rev, Nice Bob, Todd, and Dr. D. They went out towards the point. I decided to go left to the reef. Like last week, I just combed the reef slowly with the camera taking shots. Again, saw the usual stuff to include a fairly big spanish shawl and a cool yellow/black rock fish. Don't see those too often. Stumbled a bit on entry but exit was good. This time a dove with the force fins--much better for working the reef.
