Equipment build: 7mm suit + vest w/hood; one light; 131lbs weight; camera with strobe,

Another good dive at OML. Vis only 8ft despite the calm water. Entry/exit has been rearranged by the construction crew so there are new rocks to deal with. So long sandy beach. This time we saw a sun star cruising the sand in the cove and many other sun stars on the reef--one was really big. Like yesterday, the perch would get eye to eye with you if you sat still. The greenlings were skittish today and I never could get a close up. Still, a really good dive and long debrief afterwards.
