## Water Type

Salt Water

**Site:** 120 deg reef

**Buddy:** Military Bob, Joe, Nice Bob, Jordan, Dr D, Rev Al

## Comments

Equipment build: 7mm suit + vest w/hood; one light; 13 lbs weight, camera

Decided to breakout the tech rig and the Kirby reg today to give them some use.

Big crowd today for Sunday services. Guess many needed Rev Al's wise words. Or maybe it was just a perfect day to be at the beach. The OML Mayor even showed up early to strum up votes for the 2012 election (Max Bottomtime for prez!)

Seven divers in the water and even Joe made his quarterly OML dive. Water was flat and entry/exit straight forward. Vis still a lowly 5-8ft but doable. This time we explored the more north and east section of the reef, and it's some good structure I don't explore enough.

Aside from a stash of Hermisendas (find one and you'll find several), we saw a Hermisenda and a lemon dorid fighting or making out (couldn't tell which). Guess if we see some lemon dorids with white-tipped spines next year we'll know.

A small octo was cruising the reef, and he didn't hang around when we showed up. He scampered down the rock looking for a hole. Finding none, he hid on the underside of a small overhang and blended in

## Additional Notes

perfectly to the rock. It was an impressive feat of camouflage.
