Equipment build: 7mm suit + vest w/hood; one light; 13lbs weight; camera no strobe.

Another great dive at OML. Six divers in the water and all entered at the point. Surge was low and water was calm. The Rev put us right on the pinnacles and the statue. From there we explored a bit before making the long swim for the cove. Saw several large sunstars, spanish shawls, one large lingcod, and the usual reef critters. Also got some video of the statue this time. Vis was about 15ft and water temp was comfortable. The swim back was uneventful, and we came across the huge fishing net that seems to migrate from place to place.
