Salt Water

Site: 120 deg reef

Buddy: Rev Al, PSD, John, and several others

Comments

26 Oct 08

Equipment build: 7mm suit + vest w/hood; one light; 13lbs weight; camera no strobe.

Some breakers at the point convinced us to head to 120 deg reef for an easier entry. In all, 6 of us hit the reef. Vis was in the 10-12 ft range and better than it looked from the ridge. The Rev had lead, and I stuck with PSD. The reef was 'alive' (as it always is). Wildlife included: Large sunstar, a brilliant yellow nudibranch, a large school of opal eye, sheephead, perch, garibaldi, to name a few. A few big breakers were hitting the cove, but timing the exit wasn't too hard. All made it out without incident. All in all a great dive on the reef.
