Great dive at OML. After 5 weeks dry, the water finally was diveable. We had to call Mike and negotiate our way in, but it was totally worth it. Water was flat and vis was 15-20 feet even with no sun. We surface kicked to the reef and dropped down. It was great to be back on this reef. Gargonians, sheephead, garibaldi, nudibranchs, anenemies, an octopus, were all out. We headed southeast a bit then turned east then north. We then headed back west for a bit before heading south and surfacing not far from where we dropped down. We then took a heading and kicked in. Even the sandy cove was clear. Just a great dive.
