Comments

Equipment build: 7mm suit + vest w/hood; one light; 13 lbs weight, camera

First time ever diving Honeymoon cove. Wow, but that's a very tough hill. Vis from the ridge looked promising so we went for it. Entry/exit fairly straightforward, and we surface kicked a long way before dropping down.. Vis started out 10-12 ft but dropped a bit as we got further out. There was a very noticeable thermocline at 30 ft.

Lots of senoritas, and also saw small male sheephead, garibaldi, kelp bass, san diego dorids, sunstars. The wall on the return trip was particularly cool. There was quite a bit of surge and current on the bottom.
